Title 234 - Board of Examiners for Land Surveyors - Rules and Regulations

Chapter - 9 - Disciplinary Actions:

001. The Board may revoke or suspend the registration of any land surveyor or place any land surveyor on probation when such land surveyor has been found guilty of: (1) fraud or deceit in obtaining a registration; (2) negligence or incompetency in the performance of his or her duties; (3) misconduct in the performance of his or her duties; or (4) failure to file a record of survey as provided in Section 81-8,122.01, R.R.S., 1943. Before the Board shall take such disciplinary action the applicant or registrant shall be given a hearing as provided in Section 81-8,124 to 81-8,125, R.R.S., 1943 conducted according to Chapter 11 and all other applicable rules and statutes. Sec. 81-8,122.01; 81-8,124 and 81-8,125

002. The Board may revoke the registration of any inactive registrant when such registrant has been found guilty of: (1) fraud or deceit in obtaining a registration; (2) negligence or incompetency in the performance of his or her duties while actively registered; (3) misconduct in the performance of his or her duties while actively registered; (4) failure to file a record of survey as provided in Section 81-8,122.01, R.R.S., 1943 while actively registered; or (5) actively practicing land surveying while inactively registered. Before the Board shall take such disciplinary action, the applicant or registrant shall be given a hearing as provided in Section 81-8,124 to 81-8,125, R.R.S., 1943 conducted according to Chapter 11 and all other applicable rules and statutes. Sec. 81-8,119.01; 81-8,122.01; 81-8,124 and 81-8,125

003. The "Minimum Standards for Surveys" published, approved and recommended by the Professional Surveyors Association of Nebraska at its annual meeting in February 1989 is hereby made part of these rules and regulations as Addendum A. The "Minimum Standards for Improvement Location Surveys" is hereby made part of these rules and regulations as Addendum B. The Board in consideration of any action based upon negligence, incompetency or misconduct of any land surveyor or inactive registrant shall use these ~~"Minimum Standards for Surveys"~~ above noted addendums and all publications to which they refer. The use of these standards shall be the guideline for practice but shall not prevent the Board from using its collective experience and judgement to determine when negligence, incompetency or misconduct has occurred in any specific instance.

004. Any registered land surveyor or inactive land surveyor who received his or her registration based upon registration in another state shall be subject to disciplinary action based entirely upon actions taken by that state. In the event that said state revokes such registration the Board shall revoke the Nebraska registration. In the event that said state suspends such registration the Board shall suspend the Nebraska registration for a similar period. Any revocation or suspension implemented under this paragraph shall become effective 30 days after the action of the Board unless appealed by the registrant. In the event of an appeal the registrant shall be given a hearing conducted according to Chapter 11 and all other applicable rules and statutes. Sec. 81-8,124 and 81-8,125

Addendum B

Minimum Standards for Improvement Location Surveys

Preamble

These standards are intended to be the minimum requirements for improvement location surveys in the State of Nebraska.

An improvement location survey shall be defined as a survey which produces a report that shows the location of buildings with foundations actually located on the land covered by the legal description provided by the client. The improvement location survey is not a boundary survey as identified by Nebraska State Statute 81-8, 109.

Research and Investigation

- A. The Registered Land Surveyor shall use the description furnished by the client to perform the improvement location survey. If the Registered Land Surveyor determines the description to contain apparent incompleteness, insufficiencies, or be subject to junior/senior rights, the Registered Land Surveyor shall so advise the client that additional information will be required to complete the survey.
- B. After all necessary written documents, as furnished by the client, have been analyzed the survey shall be based on a field investigation of the property. The Registered Land Surveyor shall make a thorough search of physical monuments and analyze evidence of occupation. A minimum of two (2) monuments acceptable to the Registered Land Surveyor within the same block in urban situations and within the same section in rural situations, either found or re-established, shall be used.
- C. Monuments may be permanent and semi-permanent points such as, but not limited to, stones, axles, re-bars, crosses, and pipes. Fence lines, mowing lines, hedge rows, etc. are not considered acceptable monuments of the parcel of land. Appropriate survey instrumentation and measuring equipment shall be utilized. The minimum shall be transit and/or measuring tapes.
- D. A Registered Land Surveyor in the State of Nebraska shall not provide to any party an Improvement Location Report unless in possession of a work order signed by the client as indication that he/she has been advised of the different types of surveys available and the scope of each.

Drafting

A sketch of the parcel of land (titled Improvement Location Report) shall be used in support of the improvement location survey and the following minimum standards shall be used.

- A. Parcel lines with the dimensions from the deed description or plat shall be shown.
- B. Major improvements (permanent structures) shall be shown with dimensions and descriptions (e.g., residences, garages, outbuildings with foundations).
- C. Major improvement locations shall be shown with dimensions to the parcel line, with two dimensions shown. Offsets shall be shown radial or perpendicular to the parcel line. The level of certainty of the measurements shall be so indicated in parenthesis after each dimension or by means of a general note. Example: 12.5' ($\pm 0.5'$), 20' ($\pm 1'$)
- D. Monuments accepted shall be shown and described.
- E. Easements provided to the Registered Land Surveyor by the client shall be shown.
- F. A North arrow shall be shown.

- G. The following caption shall appear prominently on the report:

Improvement Location Report

- H. A statement that the accompanying Improvement Location Report is a representation of the conditions that were found at the time of the improvement location survey and that the document does not constitute a boundary survey and is subject to any inaccuracies that a subsequent boundary survey may disclose. It shall state that the information shown on the report should not be used to establish any fence, structure, or other improvements. The report shall state whether the measurements shown on it are based on plat or deed information and verified as shown and that the Improvement Location Report represents only visible building improvements.
- I. The legal description of the parcel of land shall be included on the report.
- J. The Registered Land Surveyor shall sign, seal, and date the report.

Legal Description: _____

Deliver _____ Copies to: _____

Anticipated closing date: _____ Need by date: _____

Is estimate of fee required prior to service? Yes _____ No _____

Please read carefully and indicate the type of service you wish to order.

___ **Improvement Location Report:** This is a minimum survey that shows the location of the buildings and foundations actually located on the land covered by the legal description proved by the client. This is NOT a boundary survey and is subject to any inaccuracies that a boundary survey may disclose. THE IMPROVEMENT LOCATION REPORT SHOULD NOT BE USED OR RELIED UPON FOR THE ESTABLISHMENT OF ANY FENCE, STRUCTURE OR OTHER IMPROVEMENTS.

___ **Boundary and Improvement Location Survey:** A boundary survey of the parcel of land will be made in accordance with State Statutes and the corners of the parcel of land will be located and verified or re-established. The improvements on the parcel of land will be located and a check for encroachments onto or from the subject parcel of land will be made. This survey CAN be used for the construction of a fence, structure or other improvements.

___ **ALTA (American Land Title Association) Survey:** This is the most comprehensive type of survey. It covers all the aspects of the boundary and improvement location survey together with the identification of any additional evidence of possession or use which could be adverse to the interests of the borrower.

We, the undersigned have read, understand and have indicated the type of survey to be performed.

Addendum A

Minimum Standards for Surveys

(H) Monumentation

The surveyor shall establish, reestablish or confirm the prior establishment of permanent monuments at each corner on the boundary lines of the parcel being surveyed. Monuments shall be solid and substantially free from movement. In such cases where the placement of a permanent monument at the true corner is impractical because of instability or is likely to be destroyed, the surveyor shall set a corner accessory monument and show its relationship by dimension to the true corner.

The monuments set shall be constructed of material capable of being detected by commonly used magnetic locators. These monuments shall consist of an iron pipe or steel rod with a minimal diameter of one-half inch and minimal length of twenty-four inches. A durable cap bearing the registration number of the professional land surveyor responsible for the establishment of the monument shall be affixed securely to the top of each monument. When extenuating circumstances dictate, the surveyor may use such monuments as an embossed nail or a nail with an embossed washer or tag which has probability of permanence. With the exception of star drill holes and cross-cuts, all monuments shall bear the registration number of the professional land surveyor responsible for the establishment or re-establishment of the monument. Where a corner or a line falls on or within a wall, column line or other physical feature and the placement of a monument is not feasible, the wall, column line or physical feature shall become the monument by reference thereto. In lieu of the above standards, monuments set by County Surveyors, as mandated in the instructions from the State Surveyor, shall adhere to the higher standards as stated therein.
